

# Fractals Song

(Tune: the wise man built his house upon the rock)

Jesus created repeating patterns  
I can see them all over the world  
The flowers, the trees, the leaves, or the snow,  
They are fractals in nature.

## Chorus

Fractals can be exact self-similar  
Fractals can be quasi self-similar  
Fractals are just repeating patterns  
On which the house of God stands firm

Reform lines have repeating patterns  
We find them in each dispensation  
Boston, Concord, Exeter, and test  
They are part of the structure

First! we have a message who arrives  
Second! We have an Increase of Knowledge  
Third! The message itself formalized  
Fourth! We finish with a test.
